

Privacy & Information Security

Basics, Practice Tips & Hot Topics

Webcast

Watch this program from your office via live webcast or attend in-person in Chicago! More than one person may watch webcast for single price. One Webcast hook -up per registration.

Personal information is everywhere. It is in employment records, patient files, customer purchase histories and Internet usage. Because of the potential sensitivity of this data, regulators are increasingly active enforcing non-compliance.

Concurrently, regulators are increasingly prescriptive in mandating how a firm must protect the information it collects. These myriad rules create a difficult environment for companies that wish to comply but have conflicting obligations between different jurisdictions.

If you have employees in California, Illinois and Massachusetts and customers across the US and Europe, compliance with the applicable rules requires thought, planning, and sometimes compromises.

Our panel of experts includes in-house counsel and FTC representatives as well as experts in privacy, data security, and e-discovery.

By attending, you will take away a broad understanding of the issues as well as key practical tips for advising your clients in this area.

This program will be videotaped and broadcast live over the internet ("Live Webcast"). Multiple persons may view/listen to the webcast for the price of one live webcast log-in registration.

Topics to be covered include:

- Internet and Consumer Privacy
- Enforcement
- Litigation and e-Discovery
- Data Security Compliance
- International Considerations
- Managing Data Breaches
